

ECC006 Homework Assignment 4

1. Which type of CSS is coded in the body of the web page as an attribute of an HTML tag?

b. inline

2. Which of the following is the CSS property used to set the background color of a web page?

b. background-color

3. Which of the following describe two components of CSS rules?

a. selectors and declarations

4. Which of the following associates a web page with an external style sheet?

c. <link rel="stylesheet" href="style.css">

5. Which of the following configures a background color of #00CED1 for a web page using CSS?

a. body { background-color: #00CED1; }

Q6: Find the error. Why won't the page display properly in a browser?

The page does not display properly because the <style> tag is not closed correctly. Instead of using a closing tag </style>, the code mistakenly uses another opening <style> tag.

Correct code:

```
<style>

body { background-color: #000066;

color: #CCCCCC;

font-family: Arial,sans-serif;

font-size: 1.2em; }

</style>
```

Because of this error, the browser cannot properly interpret where the CSS ends, which causes rendering issues for the entire page.
